

CHALLENGER-8000

CHALLENGER 8000 is a multi-application traffic offense recording system for evidence of speeding poor, driver behavior and accident scenes. The system is a combination of LASER TECHNOLOGY USA Ultralyte Compact 1000M range Laser gun. 220X zoom SONY head camera, a 7" inches high resolution TFT monitor and a high quality SONY Digital Video Recorder.

The system is simple to operate with a remote for all controls. It is a static speed measurement system and literally needs a little training to learn operation of the system. The system can be mounted on a tripod outside the vehicle or it can be mounted inside the vehicle on a vehicle mount available as an option.

It is a portable light weight compact system which can easily be transported anywhere. It features highly accurate speed readings with speed and data verification. Zero speed can be displayed to satisfy violator regarding the calibration of speed gun.

Last 100 recorded events can be displayed by touch of a button to show speed violation to the aggressive speed violations without wasting time.

High quality Digital video serves as a permanent record for police library. The system displays departments name, fool proof counter, speed, range, date, time, name of the patrolling officer, etc. This system has a self calibration mode to electronically calibrate the laser and on screen cursor.

A printer can be attached to the system on site or in the office to attach an evidence with the police ticket.

GPRS System to transmit live image of violating vehicle back to office or challan centers is also available.

The system can be attached to a computer to digital image library and to be attached to challan form.

Custom made software can also be provided to print challan form along with the picture of violating vehicle along with the driver.

The system is developed by highly qualified engineers with the close co-operation of Pakistan Motorway Police has turned OUT TO BE A MOST COST EFFECTIVE, ECONOMICAL and next generation system. The system is backed by solid one year guarantee with training facilities in Pakistan as well as on sites.

WORLD'S MOST ECONOMICAL SPEED LAW ENFORCEMENT SOLUTION.
